## EXPERIMENT AND MODELLING OF THE COMPETITIVE SORPTION AND TRANSPORT OF CHORINATED ETHENES IN POROUS MEDIA

Cuvillier Verlag Okt 2005, 2005. Taschenbuch. Book Condition: Neu. 208x147x17 mm. Neuware - The transport of multiple solutes in natural aquifers may be influenced by the hydrologic, geologic and environmental conditions. A competitive sorption may take place, increasing the complexity of the mechanisms that could define the transport and fate of the substances. An understanding of the competitive sorption and the multiple factors that could influence it were investigated. Column experiments were conducted to investigate the transport and the competitive...

### Reviews

*This sort of pdf is almost everything and taught me to hunting ahead of time and a lot more. It is writter in basic terms and not hard to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.*
