Atlantic Publishers & Distributors (P) Ltd., 2011. Hardcover. Book Condition: New. Nuclear, biological and chemical weapons are the most destructive in the category of weapons of mass destruction. The United Nations has succeeded in eliminating the last two from this destructive trio through international agreements. Consequently, nuclear disarmament is one of the two most important issues presently engaging the world body, the other being the jihadist terrorism. Once the UN finds solution to these two seemingly intractable problems, the world would have no problem in establishing universal peace. Once the two nations come to an agreement on elimination of these nuclear weapons, the rest of the nuclear weapons states will fall in line. For that to happen, the international community must continue to lean on the US and Russia. The book has a wide coverage and comprehensively deals with various issues of nuclear disarmament, viz. nuclear, biological and chemical arms; sincerity or otherwise of nuclear weapons states; nuclear non-proliferation; control of production of fissile material; nuclear vs conventional arms; building a nuclear weapon free world; deterioration of nuclear environment during the last two decades; combating nuclear terrorism; threat of bio-terrorism; cyber weapons; and ban on cluster bombs, among others. Besides, latest developments in nuclear disarmament, including major points discussed in recent disarmament conferences, nuclear security summits and plenaries have also been included. The book is as much meant for the strategic community as for the laity for its insightful treatment of all the relevant issues and aspects of the subject of nuclear disarmament....
